

ISHAPPA N

Frontend Engineer · React.js · Next.js · React Native · TypeScript

+91 85488-63304 | ishwarkuri4@gmail.com | [GitHub](#) | [LinkedIn](#) | Bengaluru, India

PROFESSIONAL SUMMARY

Frontend and Mobile Engineer with 3+ years building production-grade web and mobile applications for global e-commerce brands serving 1M+ monthly users. Specialized in React.js, Next.js, and React Native — boosting Lighthouse scores from 65 → 90+, reducing mobile load times by 20%, and shipping Checkout.com payment integrations, Firebase analytics, and MoEngage engagement tools at scale. Working knowledge of AEM and daily use of AI coding tools (Claude Code, GitHub Copilot) to ship faster. Adobe Certified AEM Developer (2024) and certified in Claude Code: Software Engineering with Generative AI Agents (Coursera, 2026).

TECHNICAL SKILLS

Frontend	React.js, Next.js (SSR / ISR / SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Responsive Design, Cross-browser Compatibility
Mobile	React Native (iOS & Android), React Navigation, Deep Linking, Push Notifications, Xcode, Android Studio, App Store & Play Store Deployment
State Management	Redux, Redux Toolkit, Context API
Performance & SEO	Core Web Vitals, Lighthouse, Code Splitting, Lazy Loading, Bundle Optimization, CDN, TTFB, Performance Monitoring
Payments & Analytics	Checkout.com, Google Tag Manager (GTM), Firebase Analytics & Crashlytics, MoEngage
Tools & DevOps	Git, GitHub, Bitbucket, CI/CD, Jira, Postman, Sentry, Akinon ACC
AI Dev Tools	Claude Code, ChatGPT, GitHub Copilot — used daily for AI-assisted development
Working Knowledge	AEM (Sling Servlets, OSGi), Java, Spring Boot, Node.js, Python, FastAPI, REST API integration — from platform and AI project work outside core frontend scope

PROFESSIONAL EXPERIENCE

Software Engineer — Codilar Technologies Pvt Ltd

Sep 2023 – Present | Bengaluru, India

Next.js E-Commerce Storefronts — R&B, Lulu GCC, Clarks, Ooka

Next.js · React.js · TypeScript · Tailwind CSS · Redux Toolkit · REST APIs · SSR/ISR · Checkout.com · GTM

- Delivered features, payment integration and performance work across 4 high-traffic Next.js/React storefronts serving 1M+ monthly users across GCC markets — delivering measurable Core Web Vitals improvements and SEO ranking gains for international retail brands.
- Boosted Lighthouse performance scores from 65 → 90+ by implementing SSR/ISR, dynamic code splitting, CDN image delivery, and elimination of render-blocking resources — directly improving organic traffic.
- Built and shipped Checkout.com payment gateway integration (tokenisation, 3DS authentication, order confirmation webhooks) enabling secure, PCI-compliant checkout across all GCC storefronts.
- Rebuilt and stabilised the Ooka storefront on React/Next.js after an initial AEM migration attempt was evaluated, delivering the platform the client ultimately committed to production; built the AEM proof-of-concept itself (working knowledge of Sling Servlets, OSGi).
- Designed a cross-project Tailwind CSS component library (40+ components) adopted across all brand codebases, cutting feature delivery time by ~30%; architected Redux Toolkit and Context API state for cart, checkout and wishlist flows across desktop and mobile web.
- Instrumented the full e-commerce funnel with GTM data-layer events for accurate conversion attribution, and contributed to CI/CD and PR review workflows via Akinon ACC.

React Native Mobile Apps — R&B, Lulu GCC, Koton

React Native · iOS · Android · React Navigation · Firebase · MoEngage · Deep Linking · Push Notifications

- Shipped cross-platform shopping apps (iOS + Android) to the App Store and Play Store — serving hundreds of thousands of active shoppers and driving mobile-first revenue for GCC retail brands.
- Reduced app cold-start time by 20% through AsyncStorage caching, batched API calls, and JavaScript bundle optimisation, measured via Firebase Performance Monitoring.
- Integrated Firebase Analytics and Crashlytics for funnel tracking and crash reporting, and implemented MoEngage push campaigns, in-app messaging and segmentation with deep-linked promotional entry points — improving release quality and conversion from push clicks.
- Owned the end-to-end release pipeline (Xcode/Gradle builds, TestFlight/Play Console staging, review coordination, phased rollout) with zero critical production incidents; built the Koton app live for the Turkey region, now extending the same codebase with region-specific backend integrations for GCC (in UAT).

AI WORK & PROJECTS

PerfLens — AI-Assisted Web Performance Regression Gate (CLI)

Node.js · TypeScript · Lighthouse · Claude · CI/CD

- Built a Node.js/TypeScript CLI that catches web performance regressions before a pull request merges — runs Lighthouse against a build and diffs metrics against a baseline through a configurable threshold engine.
- Used multi-run median aggregation and tolerance bands to suppress false failures from Lighthouse variance, keeping the CI check deterministic and able to run offline.
- Building optional AI root-cause analysis (in development, Claude-based) to correlate regressions with changed files — designed to stay non-gating, keeping the deterministic CI check itself AI-free.

AI Enterprise Data Assistant — LLM Tool Calling on FastAPI

Python · FastAPI · Claude & Gemini APIs

- Built an LLM tool-calling backend letting business users query live enterprise data — e.g. product/order data and Google Analytics 4 — in natural language, grounding every answer in a live API result to prevent hallucination.
- Delivered as the proof of concept a client used to approve a broader AI initiative; use AI coding tools (Claude Code, GitHub Copilot) daily and hold the Claude Code: Software Engineering with Generative AI Agents certification (Coursera, 2026).

CERTIFICATIONS

Claude Code: Software Engineering with Generative AI Agents — Vanderbilt University, Coursera (2026) · Adobe Certified Professional, AEM Developer — Adobe (2024) · Java Full Stack Development — JSpiders (2023)

EDUCATION

B.E. in Mining Engineering — Dr. T Thimmaiah Institute of Technology, KGF, India · Jul 2018 – Jul 2022
